About Me

I am a Software Engineer with experience in developing innovative apps & services that expedite the efficiency and effectiveness of organizational success. Well-versed in technology and writing code to create reliable and user-friendly apps—always following software engineering best practices, design principles, and code testing. I always look for challenges where I can use my potential at most and always love to work on cutting-edge technologies.

Experience

- **Naked Development | Full-Stack Developer**   **(July 2021 – Present | Irvine)**

✓ **Dish Out App (FinTech)**

Dish Out is a solution for restaurant owners and employees to seamlessly distribute, split & share tips.

  – Implemented Context API into the mobile app, simplifying state management resulting in faster performance throughout the app

  – Integrated Dwolla and Synapse APIs into the Web and Mobile app, allowing users to create personal financial accounts within the app

  – Optimized Web app by reducing initial load times and added lazy loading/caching features

✓ **Tribe App (Social Media)**

Tribe is a secured private social media app for colleges & universities offering stories, Live streaming, etc.

  – Created stories feature and real-time chat notification system

  – Implemented Detox to cover 90% of tests for the app

  – Integrated Typescript throughout Tribe app, resulting in faster deployment and fewer developer errors

Language/Tools: TypeScript, Node.js, Express, React, React Native, Detox, MySQL

- **Hacked for LA | Frontend Developer (Volunteer)**   **(July 2021 – Sep 2021 | Los Angeles)**

  ✓ Created dashboard and UI changes for users and admin for a better user experience

  ✓ Code and develop a system-wide design language

Language/Tools: TypeScript, React, StorybookUI

- **Munca Technologies Inc | Frontend Developer (Contract)**   **(Mar 2021 – June 2021 | Online)**

  ✓ Developing scalable, reusable components for user-profiles and ride finding feature

  ✓ Translating UI designs and UX wireframes into high-quality code

Language/Tools: React Native, TypeScript, Redux

Skills

- **Programming Language:** JavaScript, TypeScript, Golang
- **Tools and Interests:** React, React Native, Redux, Node.js, Express, MySQL, MongoDB, PostgreSQL, Sass, Styled Components, Bootstrap, Storybook, Unit Testing, Detox

Education & Certification

- **Software Engineering Bootcamp |Springboard**   **(2020 - 2021 | Online)**

  ✓ 700-hour curriculum in full-stack development with 1:1 industry expert mentor oversight and completion of an in-depth portfolio projects

- **California State University |Bachelors in Psychology**   **(2011 - 2013 | Los Angeles)**

- AWS Certified Cloud Practitioner
